

AUDIONET

Scientific magic.

Function

Microprocessor controlled Ultimate Linear Integrated Amplifier.

Anschlüsse

- Inputs:
- 4 pair Cinch line, Rhodium (Furutech)
 - 2 pair XLR balanced, gold plated (Neutrik)
 - 1 D Sub 9 serial port (control only)
 - 1 SMA for WLAN (control only)
- Outputs:
- 2 pair Cinch line, Rhodium (Furutech)
 - 1 pair Cinch inverted, Rhodium (Furutech)
 - 2 pair XLR balanced, gold plated (Neutrik)
 - 2 Audionet Link, optical
 - 1 connector, gold plated, for additional earth connection

HUMBOLDT

The Cosmic Solution

This is a scientific paper.
For holographic images and optimal resolution please do visit your audionet expert dealer.
Thanks very much. We're glad you are with us.

advanced circuitry and technology money can buy in today's highenddom, HUMBOLDT stands as an integrated amp unlike any other on this planet. Our HUMBOLDT is the namesake of famed polymath, geographer, naturalist and explorer Alexander v. Humboldt who resurrected the use of the word cosmos from the ancient Greek and assigned it to his multivolume treatise, Kosmos, in which he sought to unify diverse branches of scientific knowledge and culture.This important work also motivated a holistic perception of the universe as one interacting entity.Thus aptly named, Audionet's HUMBOLDT explores the universe of music and leads us to discoveries unheard before. Enjoy the ride!

- The floating panels of the body are resonance-optimized by pads on an aluminum frame.
- Mounting and bolted assembly of transformers made of stainless steel.
- Air Flow Design circuit boards for an optimum of cooling and stable quiescent currents.
- Galvanic separation of all analog circuits by opto couplers.
- Rhodium RCA inputs and mains connector by Furutech.
- Volume controller on a double ball-bearing axis and with magnetic ratchet and optical sensing.
